## Experience

**August 2023 - now**
Tetrobyte | Georgia (remote)
### Unity Game Developer
I have been freelance working on a game project that involves using API, socket.io, GraphQL.

**April 2023 - August 2023**
Blue Gravity Studios | England (remote)
### Game Programmer
I worked with a team to create a AAA racing game for mobile. My responsibilities included working on physics, implementing the sound system, XP system, API communication and some general problems here and there.

**2022 - 2023**
Tense Games | Netherlands (remote)
### Unity Game Developer
I was the main programmer for a 3D game project. I implemented the whole game logics, UI, animations, physics, sounds and made some 3D models,
